The North Powys Wellbeing Programme aims to focus on wellbeing; promote early help and support; tackle the biggest causes of ill health and poor wellbeing; and ensure joined up care involving neighbourhood teams and communities working together, ensuring a more seamless service when it's needed.

A new integrated model of care for the area is being developed and will subsequently be implemented throughout Powys. The programme business case draws together the requirements of multiple partners across education, health and social care, housing and the third sector, in order to make the case for creating a collaborative, multi-agency, well-being campus to enable the delivery of the new integrated model.

The gbp team was selected at interview by a panel consisting of key stakeholders and the relationships continued to flourish, even though the world was gripped by the COVID-19 pandemic and engagement was remote for the later stages.

For specialist input, gbp was able to look to its trusted network of partners to add value.

It was important that the programme business case was properly scoped, planned and costs justified from the outset, in order that the ensuing projects/programmes can deliver their intended outcomes and benefits. Key benefits delivered by the project include:

Provided decision makers and stakeholders with a proven framework for structured thinking. ✓ Assurance that the programme is supported by a compelling case for change and will maximise social value to the residents of North Powys.

"The gbp team have worked well to complete an output whilst also operating within the COVID-19 constraints which have acted to significantly limit full stakeholder involvement. "

Outputs produced by gbpartnerships:

gbpartnerships produced a Programme Business Case document on a complex multi-agency new build campus in rural mid-Wales, involving multiple stakeholders with the output required within stringent timeframes.

Our indicative site plan illustrated how the campus might take shape, drawing in the surrounding green spaces, considering safeguarding and privacy and dignity details, and addressing the constraints of the site such as the floodplain and access.

Our Impact:

The business case was approved in October 2020; Powys will now work towards briefing and developing the Strategic Outline Case(s)/Business Justification Case(s) that emerge, in order to progress the development of this much needed campus.

Through this work, gbpartnerships is enabling the right decisions to be made for the local population.

Client Value:
